Working closely with local governments to make Georgia's public road network information the best it can be.

REVAMP

ROADWAY ELEMENT VALIDATION AND MAPPING PROGRAM

Roadway Elements

Collect and/or Validate

- Crosswalks
- Local Road Names
- Median Types
- Number of Lanes
- On-Street Parking
- One-Way and Reversible-Lanes
- Ownership
- Pedestrian Signals
- School Zone Indicators
- Sidewalks
- Speed Limits
- Surface Types
- Traffic Control Devices
- Turn Lanes

Roadway elements will be added as the program expands.

Our Partnership

GDOT has partnered with Regional Commissions and the University of Georgia's Carl Vinson Institute of Government to improve existing data and capture road network changes from local governments.

The Benefits

The program provides many benefits for both the local governments as well as the state:

- May lead to an increase in certain local funding programs
- Improved safety of the public roadway system
- May lead to the establishment of a formalized asset management program
- Improved federal reporting related to mileage, performance, condition, etc.
- Comprehensive statewide road characteristic information that can be used to create maps and meet multiple data requirements
